Deep Cleansing Oil
6.7 fl. oz.
300
\$24

DHC Deep Cleansing Oil

Tester: Multi-Ethnic (Chinese Jamaican) with combination skin and occasional breakouts.

"The first thing I came to realize is that I should not be put off by the face that this is an OIL. This cleansing oil is completely water soluble and unlike any other oil product I have ever used. It leaves my skin completely fresh and clean, and leaves no residue behind! I have combination skin with a slightly oily t-zone and drier areas on my cheeks and I have to say this is the best cleanser I have ever used. I followed it with the mild cleansing soap as DHC recommends. It has a nice pleasant fragrance and is not greasy at all. This is a really perfect cleanser for me." — H.Z. [Go-->DHCskincare.com](#)

\$14

DHC Mild Soap

Tester: Multi-Ethnic (Chinese Jamaican) with combination skin and occasional breakouts.

"The soap is more moisturizing than many other soaps I've tried, and does not irritate or break me out. I never really liked using soap on my face in the past because it always seemed to dry it out or make me break out. DHC's Mild Cleansing Soap lathers nicely and is very creamy and comforting on the skin. I used it after washing with DHC's Cleansing Oil, and it leaves my skin smooth, soothed and slightly moisturized. It cleans very well for such a gentle cleanser. This has turned my feelings about using soap on my face right around! My skin just feels so clean after using this soap...I then use the toner. This works!" — H.Z. [Go-->DHCskincare.com](#)

\$28

DHC Mild Lotion

Tester: Multi-Ethnic (Chinese Jamaican) with combination skin and occasional breakouts.

"I have not been a regular toner user in the past (I go back and forth in my mind as to whether it really makes a difference for my skin). However, I have to say that I feel this toner really does make a difference in my skin after washing it. It's one of those skincare items I don't think much about, but when I recently ran out of it, I missed it so much! Mild Lotion is a clear, nearly fragrance-free toner. It refreshes the skin without stripping it or making it feel dry. In fact, it actually leaves behind a smooth, soft sensation. This would be a good toner for a person with normal, dry or combo skin. The only skin type that this may not be the best for is very oily skin since it does have some moisturizing properties. As a matter of fact, I found on many days that I didn't even need a moisturizer since I started using the mild lotion. This product and the entire line is a winner in my book and I will continue to use everything!" — H.Z. [Go-->DHCskincare.com](#)
