Saving Face

With the biting cold wind outside and the hot dry air inside, your face really takes the brunt of things this winter. Here are three products that will help keep you from looking dull and dry.

DHC Q10 Travel Set

Unless you're underage, no one really wants to look older than they really are. Sun and wind damage can really age your skin. Here's where DHC's Q10 products can help. Containing coenzyme Q10—"skin's own natural age-defying compound," the Q10 product line helps your skin repair itself. And what better way to try it out than this great travel set.

Not only does it have "DHC Q10 Lotion, a balancing toner; DHC Q10 Milk, a lightweight daytime moisturizer; DHC Q10 Cream, a creamy moisturizer perfect for drier days and overnight revitalization," it also contains their great Olive Soap and Deep Cleansing Oil.
